

CORPORATE ACTIONS

Easily Track Key Securities Changes with Confidence

The screenshot displays the Corporate Actions API interface. At the top, there are tabs for 'XML Response', 'Json', and 'CSV'. Below the tabs, there are buttons for 'XML', 'JSON', and 'CSV'. The main content area is divided into two columns. The left column shows XML response data for 'GETSPLITS · NVDA · NGS' with fields like 'symbol', 'exchange', and 'splits'. The right column is titled 'CORPORATE ACTION TYPES' and lists several categories: 'SPLIT' (Forward split), 'DIV' (Dividend), 'M&A' (Mergers & Acquisitions), 'SYM' (Symbol change), and 'IPO' (New listing / IPO). Each category includes a brief description and a 'get' method name.

Keep security data current when companies make their next move

Dividends, stock splits, spinoffs, and related corporate actions can change how securities are tracked, displayed, and understood. QuoteMedia's Corporate Actions Service gives platforms structured data to stay current, reduce manual work, and keep users informed with greater confidence.

Features

- Single Corporate Actions API
- Structured Event Fields and Identifiers
- Spinoff, DRIP, and Bonus Action Data
- Forward Split and Reverse Split Data
- US and Canadian Market Coverage
- Up to 10 Years of Historical Data
- API Delivery
- Daily Data Updates
- Dividend, Stock Dividend, and Optional Dividend

Stay Current Through Every Corporate Action

The Corporate Actions Service gives platforms a single, structured source for key security-level events, making it easier to track dividends, stock splits, spinoffs, and related changes. Instead of relying on fragmented workflows or manual updates, teams can deliver the latest corporate actions data right away.

A Smarter Way to Keep Data Accurate

QuoteMedia's Corporate Actions Service helps platforms keep security information accurate, up to date, and easier to use by providing structured corporate actions data. With consistent fields, US and Canadian market coverage, daily updates, and 10 years of history, users can get a clearer context for the events they follow.

Who's it for?

Fintech Platforms

Integrate corporate actions data into investor tools, dashboards, and market data experiences.

Brokerage Platforms

Support user workflows around dividends, splits, spinoffs, and other relevant security-level events.

Market Data Providers

Enhance market data coverage by delivering the latest structured corporate action events via APIs.

Research Platforms

Provide event-level context-specific details that support security analysis and historical review.

Wealth and Portfolio

Help users understand corporate events that might potentially affect holdings, income, or security history.

Developers and Data Teams

Access corporate actions data and historical accounts through structured API delivery.

Core Product Components

Single Corporate Actions API

Access multiple corporate action event types through one structured API across different workflows.

Distribution Event Coverage

Track dividends, stock dividends, optional dividends, spinoffs, and DRIP events across workflows.

Stock Split Coverage

Access forward splits, reverse splits, bonus actions, plus stock dividend split data coverage.

Market Coverage

Support corporate action workflows across supported US and Canadian securities and markets.

Historical Event Data

Easily review corporate action activity using up to ten years of comprehensive event history.

Structured API Delivery

Integrated corporate actions data using API delivery built for modern platform workflows.

Daily Update Workflow

Keep corporate action data up to date with daily updates across supported security event types.

Expanded Event Detail

Access issuer details, symbols, identifiers, event codes, dates, currencies, and dividend amounts.
